Physics A (Gateway)

J249/01: Paper 1 (Foundation Tier)

General Certificate of Secondary Education

Mark Scheme for Autumn 2021

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

© OCR 2021

1. Annotations available in RM Assessor

Annotation	Meaning
	Correct response
×	Incorrect response
^	Omission mark
BOD	Benefit of doubt given
CON	Contradiction
RE	Rounding error
SF	Error in number of significant figures
ECF	Error carried forward
LI	Level 1
L2	Level 2
L3	Level 3
NBOD	Benefit of doubt not given
SEEN	Noted but no credit given
I	Ignore

2. Abbreviations, annotations and conventions used in the detailed Mark Scheme (to include abbreviations and subject-specific conventions).

Annotation	Meaning
1	alternative and acceptable answers for the same marking point
✓	Separates marking points
DO NOT ALLOW	Answers which are not worthy of credit
IGNORE	Statements which are irrelevant
ALLOW	Answers that can be accepted
()	Words which are not essential to gain credit
_	Underlined words must be present in answer to score a mark
ECF	Error carried forward
AW	Alternative wording
ORA	Or reverse argument

3. Subject-specific Marking Instructions

INTRODUCTION

Your first task as an Examiner is to become thoroughly familiar with the material on which the examination depends. This material includes:

- the specification, especially the assessment objectives
- the question paper
- the mark scheme.

You should ensure that you have copies of these materials.

You should ensure also that you are familiar with the administrative procedures related to the marking process. These are set out in the OCR booklet **Instructions for Examiners**. If you are examining for the first time, please read carefully **Appendix 5 Introduction to Script Marking: Notes for New Examiners**.

Please ask for help or guidance whenever you need it. Your first point of contact is your Team Leader.

Overlap questions that are common to J249/03 are indicated by grey shading in the left-hand column.

The breakdown of Assessment Objectives for GCSE (9-1) in Physics A:

Assessment Objective
Demonstrate knowledge and understanding of scientific ideas and scientific techniques and procedures.
Demonstrate knowledge and understanding of scientific ideas.
Demonstrate knowledge and understanding of scientific techniques and procedures.
Apply knowledge and understanding of scientific ideas and scientific enquiry, techniques and procedures.
Apply knowledge and understanding of scientific ideas.
Apply knowledge and understanding of scientific enquiry, techniques and procedures.
Analyse information and ideas to interpret and evaluate, make judgements and draw conclusions and develop and improve experimental procedures.
Analyse information and ideas to interpret and evaluate.
Analyse information and ideas to interpret.
Analyse information and ideas to evaluate.
Analyse information and ideas to make judgements and draw conclusions.
Analyse information and ideas to make judgements.
Analyse information and ideas to draw conclusions.
Analyse information and ideas to develop and improve experimental procedures.
Analyse information and ideas to develop experimental procedures.
Analyse information and ideas to improve experimental procedures.

For answers to Section A if an answer box is blank ALLOW correct indication of answer e.g. circled or underlined.

Question	Answer	Marks	AO element	Guidance
1	D✓	1	1.1	
2	C√	1	1.2	
3	B√	1	1.1	
4	D✓	1	1.1	
5	A✓	1	1.1	
6	D✓	1	2.1	
7	C√	1	1.1	
8	C√	1	1.1	
9	A✓	(1)	2.1	
10	D✓	1	2.1	
11	B✓	1	1.2	
12	D✓	1	2.1	
13	C✓	1	1.2	
14	D✓	1	2.2	
15	B✓	1	2.1	

Q	uesti	ion	Answer	Marks	AO element	Guidance
16	(a)		Arrow near X to the right	1	1.2	ALLOW an arrow near to X / top 3 field lines that points in the correct direction IGNORE any correct arrows on additional field lines DO NOT ALLOW any incorrect arrows on additional field lines
	(b)	(i)	At least 2 circles drawn ✓	2	1.2	
			Anticlockwise arrow on at least one circle ✓		2.2	
		(ii)	Increase current ✓	1	1.2	ALLOW Increase power/voltage/potential difference/pd
	(c)	(i)	Both points correctly plotted ✓✓ OR Any one point correctly plotted ✓ Best-fit line is a straight line passing through the origin ✓	3	3 x 2.2	+/- ½ square tolerance DO NOT ALLOW 'blobs' plotted with more than ½ square diameter
		(ii)	As the number of turns increases the number of paperclips picked up increases ✓ The number of paperclips picked up is (directly) proportional to the number of turns ✓	2	2 x 3.1a	ALLOW If the number of turns is doubled the number of paperclips picked up doubles
		(iii)	Any two from: Keep the core (of the electromagnet) the same ✓ Keep the current the same ✓ Keep the area of the coils the same ✓ Use identical paperclips ✓ Keep the distance between the electromagnet and the paperclips the same / AW ✓	2	2 x 3.3a	ALLOW Power/voltage/potential difference/pd

Q	uesti	ion	Answer	Marks	AO element	Guidance
17			Correct symbol for a cell ✓	2	1.1	
			Cell connected correct way around (for current to flow) ✓		1.2	
Q	uesti	on	Answer	Marks	AO element	Guidance
18	(a)		energy ✓	3	3 x 1.1	ALLOW energy and speed in either order
			speed ✓			
			pressure ✓			
	(b)		Any two correct calculations (one mark each):	3	2 x 2.1	
			200 x 50 = 10 000 ✓			
			250 x 40 = 10 000 ✓	A J		
			400 x 25 = 10 000 ✓			
			1000 x 10 = 10 000 ✓			
			Comment that they are the same and therefore PV does equal a constant ✓		3.2b	
	(c)		Less air (molecules) as height increases / weight of air decreases with height / AW / ORA ✓	1	1.1	

Q	Question		Answer		AO element	Guidance
19	(a)		2 ✓	1	1.1	
	(b)	(i)	B✓	2	3.2a	
			Any one from: A only goes up to 10 ✓		2.2	
			B has the best resolution (for 11N reading) ✓			
			Reading on B will be in the middle of the scale ✓			
			C goes up in 5N (increments)/ scale is too coarse√			
		(ii)	Elastic limit exceeded / spring no longer returns to original length ✓	2	2 x 2.2	
			Plastic deformation / spring permanently stretched ✓	30		ALLOW Newton-meter is broken / no longer works.
		(iii)	C ✓	2	3.2b	
			Least extension (for same force) / AW ✓	41	2.2	ALLOW spring is stiffer
	(c)		Any two from:	2	2 x 1.2	
			It is not linear ✓			
			The extension is different when loading and unloading ✓			
			Force and extension are not proportional ✓			ALLOW It does not go up (or down) evenly
			It does not obey/follow Hooke's law ✓			
	(d)		FIRST CHECK THE ANSWER ON ANSWER LINE If answer = 0.024 (J) award 3 marks	3		
			4 cm = 0.04 m √		1.2	
			½ x 30 x 0.04 ² √		2.1	
			0.024 (J) ✓		2.1	

Question	Answer	Marks	AO element	Guidance
20 *	Please refer to the marking instructions on page 5 of this mark scheme for guidance on how to mark this question.	6	1x1.2 2x2.2	AO1.2 Demonstrate knowledge and understanding of relevant equations:
	Level 3 (5–6 marks) Detailed description of method(s), including relevant		1x3.1b 2x3.3b	 volume of cube = I x b x h or (length)³ OR can use displacement for the regular block density = mass / volume
	equipment and equation(s) AND Detailed comments about accuracy/precision.			AO2.2 Apply knowledge and understanding of techniques and procedures to describe methods of determining density
	There is a well-developed line of reasoning which is clear and logically structured. The information presented is relevant and substantiated.			relevant equipment to include e.g. ruler, balance, measuring cylinder, displacement can
	Level 2 (3–4 marks) Description of method, including relevant equipment OR Description of method, including relevant equation(s) AND			 mass of copper/iron measured using balance measure length/side/edge of cube place copper (in water) in measuring cylinder and record increase in volume (of water) OR place copper (in water) in displacement can and use a measuring cylinder to measure the volume of the displaced water
	Basic comment about accuracy/precision. There is a line of reasoning presented with some structure. The information presented is relevant and supported by some evidence.			ALLOW volume of cube measured using displacement method AO3.1b / 3.3b Analyse information and ideas to evaluate and improve accuracy and precision of experimental procedures
				 repeat readings and calculate the mean make sure no zero error on balance use equipment with a high resolution read measuring cylinder at eye level / no parallax error dry the objects before measuring mass

Question	Answer	Marks	AO element	Guidance
	Level 1 (1–2 marks)			
	Basic description of method with some omissions. AND One relevant equation. OR Basic comment about accuracy/precision. The information is basic and communicated in an unstructured way. The information is supported by limited evidence and the relationship to the evidence may not be			
	clear.			
	0 marks No response or no response worthy of credit.	34)		

Q	Question		Answer	Marks	AO element	Guidance
21	(a)	(i)	Earth ✓	2	3.2a	
			g is largest ($W = mg$ and m is fixed) \checkmark		1.1	
		(ii)	Mass ✓	1	1.1	ALLOW distance from another object
	(b)	(i)	FIRST CHECK THE ANSWER ON ANSWER LINE If answer = 2000 (N/m²) award 3 marks	3		
			pressure = force / area ✓		1.2	
			600 / 0.3 🗸		2.1	
			2000 (N/m²) ✓		2.1	
		(ii)	Upwards arrow labelled as normal contact force ✓	3	3 x 1.1	ALLOW force exerted by ground ALLOW two upwards arrows, one per foot
			Downwards arrow labelled as weight ✓	4/		ALLOW force exerted by Earth
			Arrows are equal length (by eye) ✓			If two upwards arrows, each should be half the weight

Q	Question		Answer		AO element	Guidance
22	(a)	(i)	FIRST CHECK THE ANSWER ON ANSWER LINE If answer = 480 (J) award 3 marks	3		
			(0.6 kN =) 600 N√		1.2	
			600 x 0.8 ✓		2.1	
			480 (J) ✓		2.1	
		(ii)	FIRST CHECK THE ANSWER ON ANSWER LINE If answer = 9.6 (s) award 3 marks	3		
			(Rearrangement) Time taken = work done / power ✓		1.2	
			480 ÷ 50 ✓	30	2.1	ALLOW ECF from (a)(i)
			9.6 (s) ✓	130	2.1	
		(iii)	FIRST CHECK THE ANSWER ON ANSWER LINE If answer = 2.1 (A) award 4 marks	4		ALLOW voltage for potential difference
			(Rearrangement) Current = power / potential difference or <i>I</i> = <i>P</i> / <i>V</i> ✓		1.2	
			50 / 24 🗸		2.1	
			2.08(3) (A) ✓		2.1	
			2.1 (A) (2 sig.fig) ✓		1.2	

C	Quest	ion	Answer	Marks	AO element	Guidance
23	(a)	(i)	450 m ✓	1	2.2	
		(ii)	350 s ✓	1	2.2	ALLOW 5 minutes 50 s
		(iii)	FIRST CHECK THE ANSWER ON ANSWER LINE If answer = 1.3 (m/s) award 3 marks	3		ALLOW ECF from (a)(i) and(ii) ALLOW 1.2857 (m/s)
			(Rearrangement) Speed = distance / time ✓		1.2	ALLOW $s = d / t$
			450 / 350 ✓		2.2	
			1.3 (m/s) √		2.2	
		(iv)	Section E ✓	2	2.2	
			Steepest gradient or slope ✓	34	1.1	ALLOW correct speeds calculated (1 m / s) and compared for sloped sections
		(v)	(The student) Stopped✓	1	1.1	ALLOW any sensible answer related to stopping
	(b)		(Time) Watch / stopwatch / stopclock / timer AND	1	2.2	ALLOW mobile (phone) timer IGNORE mobile (phone)
			(Distance) trundle wheel / (measuring) tape ✓			ALLOW metre rule ALLOW tracking / fitbit app on mobile to measure distance IGNORE ruler

Q	Question		Answer	Marks	AO element	Guidance
24	(a)		Ammeter B AND Ammeter B does not have a zero error / ammeter A has a zero error ✓ Ammeter B can read a current of 1 A / ammeter A cannot read up to a current of 1 A / only reads to 50 mA ✓	2	3.3b x 2	ALLOW ammeter A does not start at zero ALLOW Ammeter A does not read high enough DO NOT ALLOW higher degree of precision / digital
	(b)	(i)	(For a fixed resistor) <i>V</i> is (directly) proportional to <i>I</i> / <i>V</i> = <i>IR</i> ✓ And gives a straight-line graph through the origin ✓	2	3.2b x 2	ALLOW calculation of resistance of 10 Ω from the gradient of the graph for two different points for 1 mark ALLOW constant gradient through the origin
		(ii)	Any one from: (Higher current) gives greater heating effect ✓ Apparatus was not left to cool between readings ✓	1	3.3b	ALLOW the resistor / component had heated up DO NOT ALLOW random error
		(iii)	Ask someone else to repeat your experiment ✓ Repeat experiment using different equipment ✓	2	3.3b x 2	IGNORE just repeat experiment
	(c)		FIRST CHECK THE ANSWER ON ANSWER LINE If answer = 2.5 (W) award 2 marks 0.5 ² x 10 ✓	2	2.1	
			2.5 (W) ✓		2.1
